

AUGUST 27, 2018 ROAD CONSTRUCTION UPATE

The final seal coat layer has been applied to most roads. There are a few tie-in areas that still need work. In addition to that, the contractor is expected to be sweeping up the excess rock this week.

The parking ban remains in effect until Sept 1, 2018 as previously communicated. The streets still need to be clear to allow for the remaining road work.

In the months of Sept and Oct 2018, there will be additional road surface work completed such as minor touch up and speed bump construction. Limited parking bans may be imposed if no parking signs are not followed.

As a reminder, after Sept 4, 2018, the pipe lining contractor will be in the subdivision restoring cross road culverts.
