

AUGUST 7, 2018 ROAD CONSTRUCTION UPDATE

Primary Roads (Heritage and Westminster)

The first two seal coat layers will be applied starting on Thursday, August 9th. This work is weather dependent and may start earlier or later depending on the rain currently in the forecast. Heritage Dr will only be coated from the dam to Brandy, the other sections were completed in prior years. Traffic delays will be minimal, but at times the road surface will be oil only for short periods of time (15-30 mins). Please do not drive on the oiled surface. It's also recommended to avoid the areas under construction if you can. These first two layers will be allowed to settle for about 2 weeks before the final surface is applied.

Secondary Roads

No work is planned on the secondary roads that we're reconstructed during the next week or two. A few of the streets connecting to the reconstructed portion of Heritage Dr will receive seal coating, but that's about it. In about 3 weeks, the final seal coat layer will be applied.
