

## **OCTOBER 18, 2018 ROAD CONSTRUCTION UPATE**

The parking ban currently in effect is expected to be in place no longer than it will take the road contractor to finish touch-up and shoulder operations scheduled for fall 2018. If work extends into 2019, the parking ban will be lifted once work is completed in 2018 and resume when work starts in 2019.

Currently, all involved are working hard to complete as much as possible in 2018, the parking ban will help with that. As of now, work is expected to complete before the holidays. However, if work needs to extend into late November and December, the parking ban will be lifted around the holidays. Future updates will have those details.
